

```
1: program SillyName;
2:
3: uses SysUtils;
4:
5: procedure Main();
6: var
7:     name : String;
8: begin
9:     Write('Enter Your Name');
10:    ReadLn(name);
11:
12:    if name = 'wayne' then
13:        begin
14:            WriteLn('Thats a silly Name')
15:        end
16:    else
17:        begin
18:            WriteLn('Thats a great name')
19:        end;
20: end;
21: begin
22:    Main();
23: end.
```
